you [Music] I'm Jacob Hornberger president of the future of Freedom Foundation and this is episode 29 of my series on the JFK assassination and the final episode of this series on the assassination I hope you all have found it valuable I want to thank you for your interest and your attention watching the series thank you for your great comments and what we're going to do in this final segment is put everything into context sort of a recap a summary putting all the pieces together and to do that we're going to start with what happened when the Constitution was enacted the Constitution brought into existence was called a limited government Republic that's a type of government whose powers are extremely weak extremely limited they didn't have to do that they could have called into existence of government with omnipotent powers general powers where the President and the Congress and the Supreme Court just had the power to do whatever they believe was necessary in the interests of the people of society the world etc our American ancestors didn't want that type of government they wanted a government that whose powers are very weak and very limited and that's because they didn't trust the government they considered the government the biggest threat to their freedom not some foreign nation now some foreign group their own government the federal government they considered the biggest potential threat to their freedom and their well-being and that's why they wanted to limit its powers and to make sure even more certain that that federal officials got the point the American people our ancestors demanded the enactment of the Bill of Rights which really should have called been called a Bill of prohibitions because it it restricts the power of the federal government even more including killing people that's what the fifth amendment

#### 00:02:00 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=120s)

people that's what the fifth amendment was about is it it says you can't go out and start killing people arbitrarily if you're going to kill somebody you've got to go through due process of law which is a term stretching all the way back to Magna Carta in 1215 it guarantees formal notice of the charges against a person before you can kill him in a hearing where he has an opportunity to be defend himself they guaranteed trial by jury for this purpose so this was the kind of government that was brought into existence very small military force because they are American ancestors just didn't trust large military establishment why because they knew that historically large military establishments were grave threats to the freedom and democratic processes of a society now that was our heritage a limited government Republic for you know some hundred and fifty years or so then post-world War two right after World War two everything changes this this was the one of the revolutionary transformations in the US government Americans I don't think realize it at the time but is actually even much bigger than the welfare state revolution where America's economic system got got converted from a free market private property order to a what is called a welfare state system in the 1930s where the government takes money from one group of people and gives it to another group of people well the the transformation that took place in 1945 and onward was the conversion

of the federal government from a limited government Republic to a national security state now a national security state is a totalitarian type of government a governmental structure it entails the government having not limited powers but omnipotent powers including the power to assassinate people kill people without due process of law so this is a way that they

## 00:04:02 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=242s)

of law so this is a way that they circumvented the fifth amendment by simply declaring and reforming the government into a national security state a national security state as I said is a totalitarian type of governmental system the Soviet Union which was run by a communist regime where and which was the excuse for conversion the conversion of the federal government to a national security state was itself a national security state the argument was that if that we're facing this implacable foe the Soviet Union had a worldwide communist conspiracy to take over the world based in Moscow and that if we didn't convert our federal government to a national security state they would ultimately win they would conquer the United States they take over the federal government they'd be running the IRS they'd be running the public schools and teaching communism to all the children of America and the idea was that the Communists were coming to get us I mean there was absolutely no doubt among US officials so they said in order to stop this threat we need to temporarily convert America into the same type of totalitarian system and that's how we get the giant military establishment prior to that there was a small military force a small army throughout the eighteen hundreds because Americans didn't trust large military establishments but then all of a sudden you get this gigantic sprawling military establishment bases all over the United States bases around the world then you get the CIA which has the power to assassinate people that has the power to effect regime change operations bribed foreign congressmen and spy on people and so forth and then you get the NSA which has the power to conduct secret surveillance on people around the world including the United States so these are all totalitarian like powers but the idea was that if we don't do this we the

## 00:06:01 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=361s)

idea was that if we don't do this we the American people don't do this we're going to fall to communism and and the President Truman who was bringing this thing into existence was even told like if we're gonna pull this off you got to scare the hell out of the American people and and that scare came through with respect to this anti Russia anti Soviet Union mindset I mean to get a sense of what the mindset was take the anti Russian mindset today you know how strong that is among the mainstream press they the mainstream parties and multiply that by about a thousand and then you get a sense of what life was like during the Cold War and ironically during the war the Soviet Union was America's partner and Ally and Hitler's enemy and then as soon as the war zone over the US officials say well now we need to make Hitler than me our enemy and so that's Hitler's enemy and our partner now I become the new official enemy who was even more dangerous they said then Hitler himself and so everything now had to change and so throughout the Cold War there were all these measures and everything revolved around security security you can go Google security posters NSA and you can see the kind of posters that people were seeing you know in public places security security and you know how they tell you right now if you see anything suspicious at a train station or a bus station or anywhere contact you know the authorities well it was like a thousand times like that during the whole Cold War and and this was where they went after communists they went after the Communist Party even though in a genuinely free society people have a right to promote whatever they want to promote I mean that's sort of like what the First Amendment was designed to protect but remember everything changes now with the national security state because the national security state Trump's the Bill of Rights it Trump's the Constitution and a national security and a national

## 00:08:00 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=480s)

national security and a national security state is everything and of course needless to say the Supreme Court rolled over and deferred to the new national security state on whatever they wanted so and the national security state during this period of time gets stronger and stronger and then there's this obsession with going

after communists and they go after Dalton Trumbo the Hollywood aide all the Hollywood writers the Hollywood blacklist were they there throwing people out of work because they supposedly had communist affiliations you recall the McCarthy hearings where there were so many people and saying you know have you are you now or ever have you ever been a member of the Communist Party and and if you said yes you were done I mean your employer would fire you you couldn't get a job if you took the Fifth Amendment's so you wouldn't incriminate yourself that would be just as bad that was akin to a confession of guilt and then they were they were looking for communists in the army and so the worst thing in the world ever that you could be was a communist they were infiltrating groups like the Communist Party the fair play for Cuba committee they were infiltrating people into communist other communist organizations there was even a movie called I led three lives a television series where you can still see segments on YouTube and I recommend them it's very fascinating that it was a story of an FBI agent who secretly posed as a communist and he would ferret out communist cells and then report him back to the FBI well but with one exception and as we discuss that one exception was Lee Harvey Oswald I mean this is the most incredible Cold War miracle that you could ever find because while they're going after people who maybe just had low profiles but they had communism in their background here's a guy that's waving his arms it's like a red cape in front of a bull saying I'm a

#### 00:10:00 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=600s)

red cape in front of a bull saying I'm a communist I'm a communist I mean you know it goes to the cities okay ex-marine now how many know the allegation of course on Oswald was that he was studying communism before he joined the Marines when he was high school well interestingly enough his favorite television program was I led three lives the program I just mentioned about a secret agent posing as a communist so this guy joins the Marines know how many communists have you ever seen join the Marines I mean the Marines had just killed millions of people in North Korea we're talking about the 1950s this this was a part of the you know the Cold War a hot war like Korea and later Vietnam to keep the Communists from coming over here if we don't stop them over there they'll come over here and so what are the chances that a communist is going to join the Marines especially since the Korean War has just suspended it was there was never a peace treaty so the Marines could be called upon a moment's notice to go kill more communists so here the supposed communist is join Marines where he could go kill more communist is it just has never made any sense and then they let him out early he he goes to the Soviet Union he he goes through the American Embassy and he makes his Ballu I'm defecting I'm defecting here's my passport I'm gonna give up secrets and the secrets he was gonna give up was where he was stationed at Atsugi Air Force Base when he was in the Marines and and then all this despite the fact that he was openly in the rain studying Marxism and and studying Russian he became fluent in Russia Russian to me I think anybody who's studied a foreign language knows that that's impossible without a tutor or mentor especially on a language is difficulties Russian and of course the military has language schools for that if tutors and mentors and so forth so here's I mean the Oswald's even his own fellow military guy personnel they're his friends would

## 00:12:01 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=721s)

guy personnel they're his friends would called him Osvaldo vich so here you got this cold war going on they're going after Trumbo and all these Oswald is in touch and he's in the military they were even farad trying to burn up you know communists in the military cells but not as well and then he goes over there and he's gonna tell all his secrets which presumably would include secrets relating to the CIA's top-secret spy plane the u2 which was stationed at Atsugi Air Force Base in Japan where he was stationed so he comes back home and he's practically given a red carpet treatment there's a group called travelers aid that helps him come back with a wife that has communist connections or uncle or something was part of a Soviet intelligence force but hey that doesn't stop them from coming on back to the United States moving to Dallas getting a job with a top-secret photography firm that is run that that does top-secret photography for the US government and he's mentored by a guy named de Mohrenschildt who's a conservative and has intelligence intelligence written all over him I mean you know the pictures becomes increasingly clear that this guy is an intelligence agent who was posing as a communist and they had those kind of people because remember

they're infiltrating communist organizations both the CIA and and the FBI and of course to infiltrate United you got to present yourself as a communist you got to convince people that you're a communist and if they get suspicious that you're not a real communist you're out and so here's the guy that's being infiltrated into the Soviet Union and then he goes to New Orleans and he's again waving the red cape on my Communists on my Congress but he's seen in the offices of guy Bannister an FBI agent retired FBI agent right in the middle of the intelligence community he gets a job with a coffee company whose owner is a right-wing you know anti-communist fierce anti-communist anti-castro type and one

## 00:14:02 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=842s)

anti-communist anti-castro type and one of the chances of that that he's gonna he's gonna get a former supposed defector to the Soviet Union to come in and work for him it just it defies credulity and then he's passing out pamphlets where he inadvertently stamps banisters addressed the side street addressed its office and then he's daily Mexico City again waving the Cape I'm a communist I'm a communist and then they they don't do anything to this guy I mean they don't give him the Edward Snowden treatment they don't give him the Julian Assange treatment they don't give him the John Walker Lindh treatment they don't give him any of this it like I say it's a Cold War miracle story unless you conclude that he was at US intelligence agent posing as a communist that was his cover and of course that was the rumor that the Warren Commission heard right at the very beginning they had received information and Lauren calls that top secret meeting or he says don't ever reveal the existence of this meeting he tells the court reporter destroy your your transcript to this everybody was sworn to secrecy and the only reason we learned about is the court reporter forgot to destroy her her tape recording of it and so the way they resolve it is they asked the head of the FBI and the CIA to just deny that Oswald was working for him and they denied it and that was the end of it you know no real investigation into the truthfulness of this allegation obviously it was very uncomfortable for the Warren Commission I mean even if they bought into this notion that he was a lone nut you know if he was an intelligence agent they got to do a lot of investigating as to why a US intelligence agent would kill president so you've got this strange surreal situation with Oswald now if we moved to 1961 General Eisenhower who was now present Eisenhower is giving his farewell address and he talks about this

#### 00:16:00 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=960s)

farewell address and he talks about this this deep state he didn't call it that he called it a military-industrial complex instead of a national security state or a deep state but he pointed out to the American people that this thing is very very dangerous this apparatus it's a very potential threat to the freedom and well-being of the American people and to our democratic processes which was precisely why are the framers our founding fathers our American ancestors didn't want this type of government if you had told them that that the Constitution was bringing into existence a national security state they would never approve the deal they would have continued operating under the Articles of Confederation and Eisenhower is saying this structure this totalitarian like structure is a grave threat to our democratic prostates ease into our freedom well he had seen what it would have been doing in 1953 the CIA initiates a coup against a democratically elected prime minister of Iran Mohammad Mossadegh because they perceived he was a threat to US national security because he was leaning communist he is nationalizing British oil interests and then one year later they do a regime change operation against a democratically elected president and that is Kobol Arbenz in Guatemala and and here's where they had a an assassination list now we don't know who was on the list they still won't let us know they will let us see the list because national security they said but clearly Arbenz was at the top of the list he's the president they were trying to oust so they're so they have no reluctance about assassinating a foreign president and then there's the assassination manual that came into existence at that time that we didn't learn about till the 1990s where they're studying the art of assassination and equally important they're studying me the our of covering up their role in the assassination so this is what they're

00:18:01 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=1081s)

assassination so this is what they're specializing in how do we keep people from discovering that we're the ones behind this assassination and you can imagine there had to been study sessions classes I mean these are very brilliant people in the CIA Ivy League types that are trying to figure out you know how can we accomplish this assassinating people and then covering up our role and then so Kennedy's coming into office but before he comes into office there's two plans that are in effect one is to assassinate the CIA's plan to assassinate the leader of the Congo Patrice Lumumba who they perceived as a communist because he was friendly to the Soviet Union and remember this is a Cold War their mindset in the in the Pentagon the CIA was and the NSA was that if you're not with us you're on the other side this is a war of the finish that there can be never any peaceful coexistence never negotiated peace nothing this was going to be a war of the finish the Communists versus the so-called capitalists and so this is why they went after most why they went after Arbenz this is why they conspired to assassinate Lumumba and and they they made sure Lumumba was assassinated before Kennedy came into office because they knew that Kennedy would disapprove it so they rushed it and they accomplished it and like I indicated before when when Kennedy got went learned about Lumumba assassination there's a famous picture that you can see online and just google Kennedy Lumumba and you can find it under images and he's got this anguish look on his face because while Kennedy had come into office is a standard cold warrior pretty much so he was very reticent about concluding the third world independence movements were communist now according to the CIA and the Pentagon there was no doubt that they were communist movements did any movement they would try to throw

#### 00:20:00 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=1200s)

did any movement they would try to throw off the shackles of the British Empire or the Belgian Empire the French Empire was clearly communist akin there in their view Kennedy said now he says these are national movements they're just tired of imperialism they're tired of the colonialist running their their lands their nations so Kennedy comes in with that little variation which makes him suspect automatically in the eyes of the National Security establishment which has had pretty much free rein to run the show but Kennedy comes in and things start to change because he's exercising more control and and the problem starts out with the Bay of Pigs where in Cuba were you know the Pentagon the CIA there they're hell-bent on a regime change operation in Cuba why well because Cuba had been taken over by a communist regime Fidel Castro they had ousted the pro-us brutal dictator Fulgencio Batista who had partnered with the Mafia and they were running casinos they were making big money the CIA had free rein in the country this was a pro-us dictatorship and Castro had come in and thrown everybody out the US and the Mafia and so they were furious over this and so the Mafia wanted it's its casinos back the u.s. wanted its dictatorship back they wanted another dictator either Batista or somebody else that was more friendly to them and so they were effecting a regime change operation they also believed that that this cat this Castro regime was a grave threat to US national security that it was they call like a communist dagger at America's throat ninety miles away and that America just could not survive with this communist regime there so they come up with a plan of we've got to get rid of this communist regime they were obsessed they're still obsessed with getting rid of the communist regime in Cuba so part

#### 00:22:02 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=1322s)

of the communist regime in Cuba so part of this this obsession was assassination and this is where the CIA and a fascinating move enters into a partnership an assassination partnership with the Mafia so now you've got to premiered the two premier assassination organizations and we're partnering with each other in an overt partnership you've got the Mafia and you've got the CIA and they connecting the liaison guy that was kind of put doing all the communicating between the two organizations was a guy named Johnny Weir Sully so it starts out though with this this proposed invasion of Cuba they've gotten planned during the Eisenhower years but CIA just didn't have time to get it completed so Kennedy comes into power and the CIA immediately presents him this plan that they look we've got to go in there and we this is the way we're gonna do it Cuban exiles are gonna conduct the invasion and and the Cuban people are gonna rise up because they hate Fidel Castro and we're gonna have freedom in Cuba again under a US dictatorship well Kennedy

was reluctant but he said look what about the u.s. role in this and they said oh no we're gonna keep that secret so Kennedy's job in this thing immediately after becoming a president was be to become a liar in chief that he was going to go on national television and said oh this invading force of Cuban exiles is liberated Cuba and the US has nothing to do with this which would have been kind of interesting because then the CIA would have had blackmail material on him for the rest of his time in office because all they would have to do is threatened to reveal the fact that he had lied to the American people about the u.s. role but Kennedy says well are we gonna are you sure this can succeed without US air support and they said oh absolutely well it was a lie they set him up they figured there's a little neophyte president they knew they

#### 00:24:01 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=1441s)

little neophyte president they knew they would need the air support and so they they figured that once this thing got going that Kennedy would have to provide the air support to avoid this this disaster of the Communists defeating these Cuban exiles is there's no way that he would just let him die there so they were setting him up to take take the fall here and or you know go in there and send the air support it well so the invasion starts and total disaster Castro's waiting for him and so sure enough the CIA says mr. president we need that air support president said I told you you know air support you told me you didn't need the air sport well yes sir but we now need it which of course they knew they were gonna need the whole time it had been a lie and so what shocked them was Kennedy said well you're not gonna get it and so the Cuban exiles went down to defeat the communists defeated the CIA's army and a lot of guys were killed some of them were incarcerated and here was the start of the war between JFK and the national security state they were furious they were livid they considered him a traitor a coward a person who had you know faced the Communists and and cut-and-run a neophyte and incompetent but by the same token Kennedy was furious at them he knew they had double-crossed him they knew he may have been set up by this organization the the CIA and so he took public responsibility for it but he fires Allen Dulles who was the revered figure the head of the CIA which infuriated the CIA even more he fired his chief deputy I mean it was there Kennedy is reputed to have said I'm gonna take the CIA tear it into a thousand pieces and scatter them to the winds whether he said it or not this was his mindset and they were just as angry at him and so were the Cuban exiles he felt that they had been betrayed so then

#### 00:26:02 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=1562s)

felt that they had been betrayed so then then he puts Bobby Kennedy his brother in charge of supervising the CIA which just infuriated the CIA because they'd pretty much had free reign under Eisenhower's regime do it kind of do what they wanted now here is this you know 30 something year old guy that's monitor and have been controlling him and and can't prep the President Kennedy was taking authority away from them and then the problems start with the military the military prevents Kennedy with a plan to strike the Soviet Union with a nuclear attack a first-strike nuclear attack just like the Japanese attack on Pearl Harbor a surprise attack and their argument was look this thing's going to end up in a war anyway hot war there's a war to the finish and we could come out on top if we if we carpet bomb them with a surprise attack with nuclear weapon you know we win because they're gonna be flattened everybody there will be killed all the Communists which the course they considered every Soviet citizen a communist that they'd be killed so Kennedy asked him at this meeting will what will they be able to have any retaliatory capacity and I said oh yeah they'll have some we won't be able to wipe out everything and Kennedy said well how many Americans do you think will be killed here and they said oh they're more than 40 million but we're gonna win because all of them will be wiped out we'll still have a few 60 million or so whatever the population was well Kennedy was flabbergasted I mean he walks away from this meeting and remarks to an aide and we call ourselves the human race he said it indignantly and then they presented with Operation Northwoods which didn't come out and to existence I mean people didn't learn about it till in 1990s as part of the assassination records review board and but at the time they present this plan the Kennedy it's it calls for false terrorist attacks committed by CIA or military agents that are posing as

00:28:00 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=1680s)

military agents that are posing as communists so here again so you got yeah government officials posing as communists under this plan and they're gonna do plane hijackings they're gonna kill real Americans and terrorist attacks they're gonna make it look like this is terrorism by Cuba and by communists and so they they presented to Kennedy and Kennedy mixes just he's not gonna go down that road because he might wanted the justification for invading Cuba and this operation Northwoods was going to give him this fake false flag excuse for invading Cuba Kennedy says no well then there's the Cuban Missile Crisis where all of a sudden you know the CIA discovers that there's missiles Soviet missiles there and the mainstream press has always said these are offensive weapons you know which implies that the Soviet Union and Cuba we're gonna use them to launch a nuclear attack on the United States but they were always the exact opposite they were defensive weapons that Castro wasn't dumb he knew through his intelligence sources at the CIA and and the Pentagon were pressuring Kennedy to invade you but he knew that he could be a you know a thousand Cuban exiles or so like at the Bay of Pigs there was no way he could defeat the US Army in an invasion just one gonna happen and so he figured his only chance was to deter such an attack was to install these Soviet missiles there that might deter the the u.s. from from invading and and if nothing else he wanted them to defend that if he was going to go down he was going to take as many people with him as possible and so that's why the missiles were there the defensive purposes to deter a US invasion well Kennedy says we can't tolerate this and he's under tremendous pressure now from the military and the CIA now these guys excuse to invade Cuba and they were livid because he had rejected Operation Northwoods you see Operation Northwoods presumably would have installed a pro-us regime there would have already been an invasion they used the false flag excuse

#### 00:30:01 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=1801s)

invasion they used the false flag excuse and then the Soviet Union wouldn't be putting missiles in here so they were limited what they considered this incompetent a cowardly president that just would not stand up to the Communists and you know with this communist dagger 90 miles away well Kennedy strikes a deal with the Soviets and the mainstream press has always said well the Soviets blinked that's not true it's the the it was Kennedy who blinked I mean thank goodness he did because as it turns out what the CIA didn't know and of course what Kennedy didn't know is that the Soviets already had their nuclear missiles fully armed and they had given the bat the commanders on the ground battlefield authority to use them in the event of an attack so they they wouldn't have to check back with Khrushchev the leader in the Soviet Union they just had the authority to fire the missiles themselves and one missile would have been it would have been a nuclear war all nuclear war and but this is the see I didn't realize this and they were saying invade and they're putting tremendous pressure on Kennedy so much so that that Bobby Kennedy told the Soviet diplomat with with whom he was negotiating they're trying to reach a deal on this thing that my brothers under great pressure we're looking at the think possibility of a coup all right so now we're going back to what Eisenhower's saying that the national security establishment the deep state the military-industrial complex is a grave threat to the democratic processes that Kennedy was saying they may just remove my brother from office and take control of this because they had no confidence in Kennedy to resolve this well Kennedy strikes a deal where he agrees not to invade Cuba anymore they just that he will prohibit the CIA in the end the Pentagon from ever invading Cuba which leaves this communist regime permanently in place in Cuba well that was it I mean the the mindset of the

## 00:32:01 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=1921s)

was it I mean the the mindset of the national security establishment was America couldn't survive with this communist dagger 90 miles away it just couldn't survive so here's Kennedy he has struck a deal with the Communists leaving them permanently in place and it for them this settlement was absolutely incredible general LeMay on the Joint Chiefs of Staff said that this is the worst defeat in US history and he Kennedy was considered a neophyte an incompetent cowardly he had just sold out America's entrance he sold that America I mean for them this was getting really close to defeat - at the hands of the Communist world and the worldwide communist conspiracy that the CIA and the Pentagon the NSA said was based in Moscow so that wasn't the end of it that the real word out and that's a big war between the national security state and

and the president but the real war gets started on June 10th 1963 and by this time because he had come so close to nuclear war he's he's got kids Kennedy achieves a breakthrough and he realizes that this whole national security states cold war is a bunch of bull it's just a racket and and that this whole thing of scare mongering and you know the Communists are coming to get us it's just nonsense well this is anathema to a national security state whose very existence is based on this fear Green that the Russians are coming to get us I mean there was even a movie called the Russians are coming the Russians are coming to me the obsession take the obsession today with Russia multiply it by a thousand and here's Kennedy's same bull it's a racket I'm putting an end to it he is like he just achieved this breakthrough because he realized how close they'd come to nuclear war here so on June 10th at American University he gives his famous peace speech where he says Cold War is over that's it we're gonna live

## 00:34:02 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=2042s)

War is over that's it we're gonna live in peaceful coexistence with the Soviet Union he didn't consult with the Pentagon on the speech or that or the CIA he just hit him with it and he and it was sort of like a slap in the face cuz he uses a term called Pax Americana which general LeMay had used in some speech in a favorable way you like there needs to be a Pax Americana around the world and Kennedy was saying that's not what we're gonna do and we're gonna work with the Soviet Union we're gonna end the Cold War we're gonna live in mutual coexistence we have different philosophies well this was impossible in the eyes of the national security state this meant defeat that and so what Kennedy was doing was exactly what Mossadegh had been doing what Armand's had been doing what what cast had been doing making friends with the Soviet Union making friends with the Communist world remember when they went after those people it was because it's all or nothing you're either with us or against us so now you have a president who is against us for whatever reason whether they're blackmailing him because of his affairs or just sheer incompetence they now realize that they have a grave national security threat right here domestically and and and their mindset is they have to protect national security from all enemies foreign and domestic so if a foreign president like Arbenz is a threat to us net security think what happens when a US president is engaged in conduct that's far worse than art what Arvin's was doing and that of course is where we would look at the Chilean coup 10 years later which they tried to keep super secret from the American people that is the u.s. role in this even killing two Americans Charles Horman and Frank teruki to keep it silent Richard Helms committing perjury before Congress he was the CIA director because here you had a national security state that's what Chile was

#### 00:36:00 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=2160s)

security state that's what Chile was just like the post-world War two u.s. that was resistant to a coup and remember general Schneider they commanding general overall commanding general of the Chilean Armed Forces says no we're not going down this road and the CIA and the Pentagon are exhorting him you have to do this this man's not only a threat to our national security Salvador Allende democratically elected president just like Kennedy very socialist just like Kennedy liberal progressive and that he that our Schneider is saying no we're not going to go down this road so they conspire to assassinate him or kidnap him and which of course involved an assassination and murder and so they remove our mats from the scene and they convince the national security establishment and shelli that they have a moral duty to remove their democratically elected president because he is a threat to their national security so even though the Chilean Constitution didn't provide for that their argument is the national security state has the duty the responsibility to ignore the Constitution because they're in their minds the Constitution is not a suicide pact that if you follow the Constitution and you're going down at the communists then what's the point so it's okay for the national security state to violate the Constitution if it saves the country and that's the mindset that's the problem they were now faced with with Kennedy throwing the gauntlet down saying the Cold War is over which of course then removes the justification for having a national security state and back then in 63 Americans still knew what a constitutionally limited government Republic was they lived under before the war today of course Americans don't know what a constitutionally limited government Republic is so when the Cold War ended like in 1989 everybody just blithely went along with oh the CIA stays the Pentagon stays because this is all part of a free society they they had no consent that this was a totalitarian structure

## 00:38:01 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=2281s)

that this was a totalitarian structure and that their heritage was a limited government republic they thought was the same type of government the whole time when 63 it was different so when Kennedy says we're gonna end the Cold War he's essentially saying we're gonna end the national security establishment we're gonna dismantle the CIA we're gonna dismantle the NSA we're gonna dismantle the Pentagon the whole military-industrial complex he didn't say that but that's the natural implication and they had to realize the import of what Kennedy was doing so not only is he threatening action that is going to cause a communist takeover he's threatening their existence and so now the war is on and so this is where Kennedy then goes and negotiates a nuclear test ban treaty over the fierce objections of the military they said that this was gonna disarm America they needed this above-ground testing which of course what they're objecting to when the North Koreans do it they said it was essential to our national security to do above-ground nuclear testing and then he starts withdrawing troops from Vietnam which just was an ethical because you know this was the Communists we're trying to take over this whole country which really was a civil war but they saw it as part of the domino theory that if the Communists win South Vietnam then they'll go to Thailand the dominoes start falling Europe Africa South America and finally the biggest domino be in the u.s. that was their mindset and so Kennedy is saying to his aides that will he order the military start withdrawing troops out of Vietnam and and all he had put was advisers and this was under again tremendous pressure he had resisted the pressure from the military and the CIA to send troops into Laos he had negotiated a settlement there with the Communists but in Vietnam II you succumb to the pressure and but now with this breakthrough he says he realizes this ridiculous he doesn't want to get the u.s. involved in this land war so he orders a partial withdrawal of a thousand troops out of I don't know

## 00:40:00 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=2400s)

thousand troops out of I don't know 20,000 or so and he tells 8 as soon as I went with 64 election of pulling them all out and then worst of all from the standpoint of the national security state starts secret negotiations with Soviet premier Nikita Khrushchev who coincidentally has achieved the same breakthrough I mean he broadcast Kennedy's peace speech at American University all across the Soviet Union he thought is the most remarkable speech of any US president and maybe since Roosevelt I think he said but it was the first time that ever done that in Soviet Union but though they they have this remarkable correspondence going on which was kept secret from the American people after the assassination but if it was just personal saying hey let's do this and they were circumventing their State Department's and Soviet Union's counterpart to their State Department the Pentagon their national security state it was just one on one saying let's do this and can it even propose that a joint moon project like going to the moon together which meant sharing rocket technology well it's a virtual certainty that the CIA was aware of these things of these negotiations so here you've got a present the United States that secretly talking to the Russian premier about working together again multiply the anti Russia mindset today by about a thousand and you see what was going on here so they're now faced the national security state is now faced with a real quandary isn't what do they do well for them there's no choice they've gotten rid of most NIC they gotten rid of Armand ten years later they'd get rid of a Yan day they were trying to get rid of Castro so to protect the country they're faced with the uncomfortable task that they have to get rid of the president this was a war of the finish they were they were they had to save America you see whenever researchers had brought up this notion that this was a regime change operation critics said oh they would never be that

00:42:01 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=2521s)

critics said oh they would never be that unpatriotic they don't understand they were operating out of a sense of patriotism they were protecting national security by removing a threat to national security and so that's where you know after that peace beach Oswald is then moved over to New Orleans where you know he's waving the red flag in front of the ball I'm a communist I'm a communist II clear in position and then he's sent to Mexico City which of course is still shrouded in mystery that's part of the secret documents that that the CIA still won't reveal remember that when JFK Records Act was enacted after Oliver Stone's movie JFK that they've released a lot of the documents which caused the dam to break on the autopsy which we'll get to in a minute but the among the records that kept secret was with respect to what was going on in Mexico City because it was clearly an intelligence operation after the assassination they they show up with a picture of somebody that's not Oswald it's supposed to be Oswald they had a recording where where the CIA director calls cause the president knew President Lyndon Johnson says well we got recording of Oswald but the problem is it's not Oswald well that's part of the batch of records at present Trump extended another three here's a secrecy four so it's clear that this this whole Mexico City thing is still shrouded in mystery but but what's also clear is that I was up there you know wiping that red flag now I was well clearly as an intelligence they see it has to be wondering why are they doing this now he's a 20-something year old guy 23:24 he's gonna do as he's told he's like a you know secondly tenth in the military that you know you tell a second lieutenant do this yes sir right away he's not gonna question orders but he hadn't been wondering why are they happy Oh doing all this public Communism stuff I've already gone to the Soviet Union what what I'm gonna go infiltrate it

## 00:44:01 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=2641s)

what what I'm gonna go infiltrate it again and then they got him in Mexico City well all this time they were monitoring it which they kept secret and watched him real carefully and of course their argument would be whoa yo he was a communist we were monitoring really well then why don't you report it to the FBI or to somebody in Dallas when the president's going to be visiting there and his parade route is right next to coincidentally the building where this guy is working well the monitoring had to be for another reason and that's the frame-up that if you're framing somebody you've got to be watching them very carefully to make sure that there you're not on to you if they're not you know suspecting that something's going on because if they're all you well that could foil the whole frame up so they have to watch him and so it stand to reason and that they're not going to warn anybody about this guy in Dallas because they're positioning them they've got him in this building they switched the parade route so that it comes right by the building and some that then reaches the plan okay and that that that concerns the autopsy now remember at the very beginning of series I said you know we've studied the autopsy first to understand the assassination well when they're gonna frame somebody clearly the frame has to be good I mean has to if it's not good people are gonna say oh that's ridiculous you know if pieces start falling about remember these people are highly intelligent they're lvy Leaguers they're specializing in the art of assassination and and the cover-up remember the assassination manual was ten years before they have ten years to be studying the art of assassination and practicing it like with Lumumba and their partnership with the Mafia to assassinate Castro so these guys have to be very good at what they do so they come up with a plan to to frame this guy but they know also that this is an assassination for president there's there's gonna be a full investigation I

# 00:46:01 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=2761s)

there's gonna be a full investigation I mean now it was a murder case they knew that it was gonna have to be and and endow in Texas the investigation the prosecution it was not a federal offense at this time to assassinate the president so the federal government had no jurisdiction here but still they knew that there was a fierce prosecutor in Texas in Dallas County named Henry Wade and they knew that there would be a full force investigation you kill a president they're gonna pull out all stops you kill a cop they're gonna pull out all stops or a federal judge which they did and there was a federal judge in San Antonio that got assassinated and man they pulled out all the stops to bring the malefactors to justice that's what we would expect that's how we expect them to operate so they would know that so they had to figure out a way to shut investigation and this is where the absolute ingenuity in a very cunning way comes into this plant so they're

gonna frame a guy in the back but it's clearly gonna be an ambush I mean when you're when you're going to have SAS native president you better be sure you succeed because if you don't president's going to pull out the full force of the government here so the ambush clearly involves people firing from the back people firing from the front all right so why would you have people firing from the front if you're framing a guy in the back and that's the sheer ingenuity of this plan because that's what ensured the shutdown in the investigation all right so so right after the the president's declared dead there's a press conference from the with the treat two of the treating physicians at Parkland Hospital and they said okay President Kennedy has an entry wound right here in the in the throat an entry wound in the front which means a shot fired from the front right then he has a huge hole in the back of his head in the occipital region the lower back of the head like an orange sized hole which

## 00:48:00 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=2880s)

head like an orange sized hole which means an exit wound remember a bullet comes in with a small little hole it pushes brain mass in front of it blows out the back and then we've got all the witnesses you recall that establish that that that you've got the the occipital bone the Harper fragment they found you've got all the treating physicians at the time said that he had this huge excellent which is why they couldn't save his life they knew as soon as I saw this one of the doctors even said this wound is is not consistent with life or something like that which which meant there was nothing they could do nobody could survive a wound like that and then you've got the the bystanders who were splattered in the back of the limousine indicating that this this hole in the back of the head was just blowing out you've got the two nurses that the treating physician and a treating nurse and then the nurse that was helping him out of it out of the car that said yeah that huge hole and then you've got the Secret Service agent clamp Hill who was you know covering the president all the way to to Parkland he verified at that massive exit wound was there you got the FBI agents who looked at the official photographs and they looked doctored this man had a massive wound in the back of his head and then you got all the inconsistent stories from the three pathologists about the massive exit wound so clearly there's these shots fired from the front and they knew this but they used this as a way to shut down the investigation now how did they do that well if you have a shooter from the rear who's a communist then that was the idea yet Lee Harvey I was what communist nobody knows he's an intelligent agent or nobody outside the CIA knows it for all practical purposes the story's worked great you know you've got him in New Orleans I'm a communist that got defecting the Soviet Union they got into Mexico City so clearly he's a communist and then don't forget you've got the d-r-e which is that Cuban exile group in New

#### 00:50:00 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=3000s)

which is that Cuban exile group in New Orleans which is being secretly funded by the CIA monitored by CIA agent George Jonas they're the first ones to immediately come out with a press release giving all of all of Oswald's communists bona fides you know telling people he's a communist he's a communist so so they're there they're really building the story oh so if they got a communist in the rear the only people who could have fired these shots from the front had to be his communist cards there's nobody else I mean like what his co-workers at the School Book Depository ridiculous his friends you know what friends it had to be a communist conspiracy that's why they had the shots fired from the front to establish that this was a communist conspiracy as a way to shut down the investigation because why is that well because if the communists have killed the president that means world war a nuclear war may remember this the Cuban Missile Crisis had just been a year before and if there was anything to scare the American people it was the prospect of nuclear war so here you now have the almost certain fact that this is nuclear war all right you might say well why not if the Communists have killed the president we have to go to war we have to go to war because clearly there's gonna have to be retaliation how do you retaliate for this you drop a bomb on Moscow a nuclear bomb to make sure you get the president well that's all out nuclear war well here's where the CIA and the Mafia's assassination scheme comes into play how does Johnson justify coming to nuclear war when it's the CIA who is established the assassination game in the first place you see so that's the

perfect justification for saying we can't go to war over this we started it they're just retaliating we got to just get as well he's the guy who did the shooting anyway and just let it go just let it go and move on so that was how to get the investigation shut down the nuclear war prospect in fact

## 00:52:00 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=3120s)

down the nuclear war prospect in fact when Henry Wade that the prosecutor I mentioned in Dallas County on the very night of the assassination he's charging Oswald with a worldwide communist conspiracy that to assassinate the President Lyndon Johnson calls him up and says you got to shut that that allegation down you gotta eliminate it you're what do you want nuclear war here so you see Johnson's role in this was to say ah there could be a nuclear war here and and of course again that scares the American people to know it scares everybody and so that's and Wade says oh okay wait and Wade immediately falls and the FBI goes and takes control of all his investigation records and so forth so then then when Johnson's appointing the Warren Commission Chief Justice of the United States here a warrant says I'm not going to serve Johnson brings up the nuclear war scenario and says if you don't serve we're looking at the prospect of nuclear war so you see he's using the shots fired from the front as a way to shut down to get Warren to come in to shut down the investigation pin it on Oswald and move on and then he does the same thing with with Russ with Richard Russell a u.s. senator who said I hate Warren I'm not going to serve on the Warren Commission and Johnson brings up the 40 million figure again that would die in a nuclear war well why would he bring that up but this was just a low net assess he brought it up in order to get these people on board that would just pin it on Oswald who nobody ever doubted the shooting nobody ever died that now Oswald as they're claiming is innocent but nobody ever gave that anything but short shrift I mean he's clearly lying when I mean go down that road and he was saying not only did I not do this I'm a patsy I'm being framed here but nobody ever gave that any serious consideration so as part of the plan you see the plan is to get rid of Kennedy and elevate

## 00:54:00 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=3240s)

is to get rid of Kennedy and elevate Johnson so you don't need to have a military takeover because Johnson's mindset is exactly on the same page as the military said you know the Communists are coming to get us communist threat and Johnson had made that clear throughout the disputes between Kennedy and the national security state Johnson had always sided with the national security state so he was one of them so they could safely eliminate Kennedy and know that one of their people was going to be elevated off isn't sure enough Johnson immediately reverses the policies he you know since troops into Vietnam and of course that's where they ultimately reach half a million and 58,000 or so American casualties deaths and that was all then a Johnson in the national security state so to pull this off they have to have a fraudulent autopsy they have to show that hey there's no shots fired from the front you see that because they're operating on two tracks here now to shut down the investigation they're conjuring up this image of a communist conspiracy based on the ship fact that shots actually were fired from the front but to calm and pacify the American people there they're operating on another track and they're saying no no this is a lone nut' this is a lone nut' we're shutting it down because it's just a lone nut and go about your lives move on and so that's what the frog's own autopsy was about now it's it's triggered at 1:00 p.m. on the day of the assassination when Kennedy's declared dead that's when the Secret Service team goes into action you know brandishing their guns and and yelling and screaming and saying we're going to get this body out of here and take it to Washington we're operating under order and dr. Earl rose the medical examiner said you're not going anywhere I I am required by Texas law to conduct this autopsy well if Rose had conducted the autopsy he would have clearly established that these shots were fired from the front and that's not what they wanted because

00:56:01 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=3361s)

and that's not what they wanted because you see they they wanted to use that only as a way to shut down investigations they didn't want Americans to learn that because if I learned Americans learned that the shots were fired from the front they would demand action against the communist like nuclear reaction or something like that which you would then expose the CIA to the Johnson would have to say well we can't really go down that road to retaliate because the CIA started this assassination scheme so on this second level they're keeping secret from the American people the fact that the shots were fired from the front so that's why that team of Secret Service agents who's operating on orders we're taking this body with us meanwhile Johnson who had to be the one issue in the order his heading to Parkland Hospital I mean to Love Field where he's having seats removed from the back of Air Force One which clearly indicates circumstantially circumstantial evidence that he's the one who issued the order I mean how else would he know that the casket was coming and so they get the casket over there Johnson's lollygagging again he presents this notion of oh this could be a first stage of a nuclear attack so he's conjuring that thing up that was clearly part of his role here and but he's lollygagging and trying you know trying to get sworn in even though Bobby Kennedy told him he didn't need to and so the whole the whole thing is very revealing because Johnson clearly has no concern about a nuclear attack at all even though he's saying that and the only reason he could have no concern at all is if he knows that as a hundred percent certainty that the Soviets were not involved in this and clearly that he had that hundred percent certainty because he knew that it was a national security state operation that he was part of because he's the guy that launches the fraudulent autopsy scheme by issuing this order for the Secret Service agents to get this thing out now ask yourself how could they have up with a a false and fraudulent autopsy

#### 00:58:02 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=3482s)

up with a a false and fraudulent autopsy scheme in the one half hour between the time Kennedy was shot and the time that the thing was launched at 1:00 p.m. where the Secret Service goes team goes into action there's no way I mean there's no way in that half hour the Johnson's gonna sit there and say you know I think we need a fake autopsy here could be a communist threat because you see they don't even have Johnson I mean Lee Harvey Oswald in custody yet isn't it he's not taken into custody until around one o'clock around the time the president was killed so this plan clearly has to be coming into existence for it to be launched at one it has to be contemplated before one before they have a communists in custody so they can't be sitting there saying oh you know we need to protect against a constant thought of a communist threat and we're gonna have to have a fraudulent autopsy I'm gonna have to get on the phone and call but there's a hospital a military hospital and Naval Hospital and tell them that we need a fraudulent autopsy it's clear just to logic and circumstantial evidence that this is a scheme that had you have come into existence prior to the assassination which can only mean one thing and that is that the cover up the frozen autopsy was built in as part of the assassination itself there's no other there is no other reasonable conclusion it either comes into existence in that half hour which is ridiculous or it comes into existence before which is reasonable but if it comes into existence before it has to be part of the assassination itself so by understanding that that principle alone about when the the frozen autopsy scheme had to have come into existence we can see who it was who initiated the assassination and so then then that's when we they arrived at in Marilyn Johnson a riser with the casket and instead of turning it over to a local coroner remember this is this is

# 01:00:01 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=3601s)

a local coroner remember this is this is not a military nation there's no war here the Pentagon did not have jurisdiction over this autopsy or this assassination but they take control over the autopsy and why because there's a super-secret climate in the military and sure enough all the participants were sworn to secrecy one of them said they put the fear of God in us if we ever talked they were they were forced they were given letters of secrecy I'm not sure where they were forced to sign him or not but they were all told this is national security this is top secret you will never talk and it helped I mean that's how that's how the military works and so they sneak the body in and enlisted men there later said that yeah the body was brought in through the back through a shipping casket so clearly they had removed the body out of the Dallas casket put it in there took the body in the pathologist there who clearly were just told that this is national security you need to do

this you need to hide the fact that they were shots fired in the front we're looking at the prospect of nuclear war and you will take this to the grave when you you will never talk and then they clearly had to taking vows of secrecy from the pathologist and and so they hide the fact that there's these shots fired from the front that's where you end up with these fake photographs which showed the back of President Kennedy's head to be fully intact that is no great big exit wound they're just they're just defrauding people as to the nature of the wound and remember Sondra Spencer's devastating testimony I mean she's the US Navy petty officer she works in the Navy's top-secret photography lab she works with the White House nobody has ever questioned her veracity her credibility or competence she says I developed they asked me to develop the autopsy photographs that was her job developing photographs on a top-secret basis and she'd said it was pretty clear that this is all top secret but 30 years later before the assassination records from new board she says she looks at the

#### 01:02:02 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=3722s)

from new board she says she looks at the official photographs and says no those are not the photographs I develop the photographs I develop showed this massive exit wound so it's clearly fraud going on here and then of course the other devastating revelation is when when commander Humes is as is calling Colonel Fink at 8 p.m. which was the official entry of the Dallas casket and the president's body into the morgue and he calls thinking he says can you come and help us we already have x-rays of the head that we've taken well how could they already have x-rays of the head if the body is officially being brought in at 8:00 the same time as the phone call major slip-up but the law calls and admission against interest there's no way to avoid that and sure enough there was the the x-ray Corman who was helping with the x-ray the technician and he said that he was taking these x-rays through the main foyer at around 8:00 when he saw mrs. Kennedy come in the front door because her car with the casket the Dallas casket empty Dallas casket arrived at 8 o'clock so he verifies that if the caskets out there in the front it's got to be empty because he's got these x-rays and that of course corroborates the admission against interest where Humes is saying we already have x-rays of the president's head in 8:00 when the body's being officially brought in at 8:00 p.m. which obviously indicates virtually conclusively that they already had the body of it if it sneaked in early so you've got this massive fraudulent autopsy that that succeeds and the secrecy succeeds the dam starts to break during the House Select Committee on assassinations in the 70s when these enlisted men started were released from their vows of secrecy and started talking about how they carried the body in early at 6:35 p.m. and then then you got all the way to the 90s people are

#### 01:04:02 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=3842s)

got all the way to the 90s people are still really suspicious of the whole official story and that's when Oliver Stone comes out with his movie JFK that pauses that this was a national security state regime change operation they're still keeping all their records secret based on national security that motivates the JFK Records Act the assassination records Review Board and then the dam just breaks on the autopsy and that's that's all encapsulated in dentals horns fantastic watershed book inside the assassination records Review Board Horan was a member of the ARB and so his his book is it's it's mammoth it's five volumes it's huge but you'll read this thing and a lot of you won't understand some of it's very complex and dealing with photography and x-rays but you'll understand seventy or eighty percent of it and at the end of that book you'll you'll inevitably reach the conclusion this was no doubt a fraudulent autopsy and of course there is no innocent explanation for a fraudulent autopsy there's none you can't come up with one that the only explanation is nefarious and that is cover-up and that's a cover-up of an assassination that was committed by the national security state because remember as we discussed in the very first segment there's one undisputed fact here and that's what we started this series with that undisputed fact is that the US military conducted the autopsy so whenever you hear all these conspiracy theories you know the Mafia did it you know space aliens did it Cubans did it the Soviets did it that Mossad did it keep in mind one thing none of those institutions had anything to do with the autopsy there was one and only one entity that ran that fraudulent autopsy that was a u.s. military so there's no innocent explanation for this no one can come up with an innocent explanation a fraudulent autopsy necessarily involves nefarious links and those nefarious

#### 01:06:00 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=3960s)

nefarious links and those nefarious things are that the national cover-up with the National Security States assassination regime change operation now remember how we drew that dichotomy you know how the press always says that AHS will act alone or did he act in a conspiracy and that's the way they always present it you see they never ever look at the third alternative was this an innocent man was he really being framed and their motive always is oh well he was a big man trying you know he's a little man trying to become a big man by killing a big man except that house will denied it you know if that's really his motive don't you think he'd say yeah I kill the president I'm a big man now you know unless you believe in this convoluted thought process where he says well I'm gonna get acquitted first and then I'm gonna go out and admit that I did it then I'm gonna be a big man and as for day kill us so you know you've got on the one side okay the lone nut' theory then he kill the president okay then why would the military conduct a fraudulent autopsy to protect alumni like him or if you put him in a conspiracy like with the Communists why would the military conduct a fraudulent autopsy to protect the Communists they aided the Communists so when you look at those two alternatives alternatives that the mainstream press presents the ridiculous and keep in mind that Oswald's not arrested till 1:00 p.m. anyway they launch the autopsy at about that time 1:00 p.m. so they can't be doing it to protect Oswald or his been some supposed conspiracy because they don't have the conspirator in their hands yet now if he had been killed at the School Book Depository 12:30 then things would be different then when they launched the thing at 1:00 they could say oh when we did a quick background check he was a communist we figured we might be looking at World War 3 here but you see by virtue of the fact that Oswald gets away without being killed at

#### 01:08:01 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=4081s)

Oswald gets away without being killed at the School Book Depository and his arrest isn't done till 1:00 as quickly as it was a most remarkable arrest ever and that they you know for you be able to pick him up within you know that sort of period of time but it foils their plan with respect to to the fraudulent autopsy because again there's no innocent explanation for a frozen autopsy has to be built in as part of the scheme so the assassination records review board comes into existence and you have this dam breaking loose on the autopsy so I recommended orange book I recommend also my book the Kennedy autopsy which is essentially a very short readable synopsis of Horne's book so if horns book looks daunting take a look at Kennedy the Kennedy autopsy also take a look at horns FFF book JFK's war with the national security establishment why Kennedy was assassinated fantastic little short easy-to-read book that talks about motive that what was the motive here and it goes over a lot of what I've discussed here about this war that was taking place and and horns a real scholar and historian and he he'll set it forth he sets it forth very well in this book I also recommend a book called JFK and the unspeakable by James Douglas it is the absolutely best introduction to what happened here that you'll ever read and I couldn't recommend it more highly and then we've got another book CIA and JFK the secret assassination files by Jefferson Morley's the guy that discovered the existence of Georgia neatest he's a former Washington Post investigative reporter and the dr-e connection to all this fascinating story there and then I guess that's oh yeah horns got a fantastic video series also for FFF go on our web site at FFF org

#### 01:10:01 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=4201s)

for FFF go on our web site at FFF org the future of Freedom Foundation and look in our video section multimedia section and you'll see a long series of maybe six or seven parts by doug horn predominantly around the autopsy but even more than that putting everything in the context of really what we've talked about in this series so that pretty much wraps up where we are now no oh yeah one more book the evil of the national security state that I've written well it's technically called CIA terrorism and the Cold War the evil of the national security state which brings us to the final lesson in this whole series you know I you people have asked me over the years now why do you spend so much time on the JFK assassination well the reason is well truth matters I mean the nation's got to come to truth with with this regime change operation you know ever since the Kennedy assassination I mean this Kent country has been a total mess I mean

when you when you disrupt a country with through an assassination like that it has ramifications that are immeasurable I mean look like look at Iran there the regime change operation there we're still living with that you know 53 and that's the root of the Iran relations er or Guatemala I mean they were thrown to a thirty year civil war because of the regime change operation and you see this name chaos here in the distrust of government so forth and that's because of that assassination and the existence of the national security state and so obviously people are already dead that committed this assassination and we're not talking about bringing people to justice so part of its the truth I mean grappling with the truth this is just part of our history this regime change operation here and coming to grips with that and what the meaning of is the significance of it and comparing it to other regime changes operations that were being carried out against presidents like Lumumba Arman's prime ministers like most of that and presidents like a yin diem and many

## 01:12:00 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=4320s)

presidents like a yin diem and many others but the real lesson here is this totalitarian structure that's why it's still relevant we're still living under a national security state the same totalitarian structure that came into existence that that replaced our constitutionally limited government Republic and that is eisenhower Porter is an even more grave threat to our democratic process in our freedom than ever it's still in existence it's the most powerful part of the federal government it is essentially a fourth branch another book I recommend is double government by Michael Glennon who's a professor of law at Tufts University he he shows how this national security branch is really the most powerful branch it trumps all the other three branches it permits them to have a veneer of authority but everybody knows that the real power in Washington is with this national security branch which is even based outside of Washington the other three branches are in Washington the Nash security state branches in Virginia and Maryland Pentagon with CIA and the NSA and and it's it's like it's no different for example in Pakistan or Egypt where the military is in charge but over there it's overt the military intelligence its overt I mean they're everybody realizes they see that they're in charge here is kept off the radar screen but everybody who watched knows where the power is so if Trump says I'm going to pull the troops out of Syria immediately then a security state says no well the nose gonna win that's just the way it is and it's that structure that needs to be abandoned it needs to be rejected that this is not our heritage our heritage is a limited government Republican that thing should never been brought into existence you don't fight totalitarian communist tyranny by adopting their communist totalitarian governmental structure you fight communist tyranny with freedom and limited government and that was the biggest mistake in American history was

#### 01:14:01 (https://www.youtube.com/watch?v=XWhHpLMDiw8&t=4441s)

biggest mistake in American history was converting the federal government to a national security state and we the American people have the right we have the right to have our limited government Republic back the Cold War which was the original justification for this junk it it went out of existence in 1989 that's when we should have gotten our republic back that's what they had said in the beginning when the conversion took place soon as the Cold War is over you can have your Republic back well we didn't get our Republic back and we're entitled to have our Republic back it's our right to have this is our heritage and so in order to achieve a free society that is a necessary prerequisite it's not a sufficient prerequisite there's a lot of other factors welfare state the drug war and so forth but a necessary prerequisite for a free society is the dismantling of the national security state and the restoration of a constitutionally limited government thank you very much you [Music]
